INFORMATICS LABORATORY

UNIVERSITY of MUHAMMADIYAH MALANG

GENERAL

TECHNICAL EXAM RULES

1. Students must arrive and be seated at least 10 minutes before the examination begins. Late arrivals will not be granted extra time.
2. All electronic devices (mobile phones, tablets, smartwatches, etc.) must be turned off and surrendered to the lab assistants or placed in the designated area before the exam starts.
3. Cheating in any form, including the use of AI tools or unauthorized materials is strictly prohibited. Any violation will result in an immediate score of 0 (zero) and disciplinary action.
4. Wi-Fi must be disabled on all personal devices throughout the duration of the examination.
5. Only VirtualBox and Rocky Linux are allowed to run. Keeping any other applications or browser tabs open will be classified as a severe violation.
6. Students are fully responsible for ensuring their VirtualBox environment is fully functional before the exam.
7. Lab assistants will not provide technical assistance for individual software issues, including but not limited to: corrupted `.ova` files, import failures, Rocky Linux configuration errors, or unexpected system crashes.
8. In the event of personal hardware or software failure, students must resolve the issue independently or immediately switch to a provided laboratory computer. No extra time will be rewarded for troubleshooting.
9. The examination is divided into timed sections. Once a section's time expires, students must immediately move to the next section; no backtracking or extensions will be permitted.
10. Certain questions are sequential (chain-linked). Incorrect configurations in early stages will inevitably affect subsequent tasks. Accuracy from the start is mandatory.
11. The exam follows a live-configuration format, mirroring the standard practicum demonstrations.
12. There are absolutely no supplementary or make-up examinations under any circumstances.

TIME ALLOCATION

Total Duration: 100 minutes (2 SKS × 50 minutes)

Effective Examination Time: 80 minutes with the following distribution:

- Preparation Phase: 20 minutes
- Working Phase: 30 minutes
- Verification Phase: 50 minutes

QUESTION FORMAT

The Operating Systems Practical Final Examination (UAP) is administered using a **Sequential Integrated Case Study** instrument. This framework is systematically designed to evaluate students' cumulative competencies across Modules 1 through 6. Students are required to execute a series of progressive technical instructions to resolve a comprehensive and objective operating system administration scenario.

This examination format enforces **strict linear dependencies between individual sub-tasks (tasks)**. Each task maintains a high degree of functional correlation with the execution results of the preceding configuration stages. Consequently, accuracy, validity, and precision in every terminal command execution serve as critical parameters from the inception of the examination.

Any initial configuration error, syntactic discrepancy, or inaccurate file permission assignment will cause a cumulative failure cascading into subsequent module clusters. The system does not provide error-isolation or fault-compensation mechanisms for compromised workflows; **hence, a failure to meet a baseline parameter guarantees that subsequent system state validations cannot be fulfilled.**
